

# An Introduction to Home-Scale Hydroponics

This free presentation will be a primer to hydroponics on a small scale. Terry will discuss the different variety of growing styles in use today. Getting started and where to get the supplies to begin will be covered. There will be a question and answer time after the presentation.

Visit [smallisbeautiful.com](http://smallisbeautiful.com) to learn about other events around small-scale living.

Terry operates a small off grid farm using many extensive organic and hydroponics techniques. The farm uses low till, multi cover cropping in cycles through the year to achieve a beneficial insect nursery and biodiversity of plants. This balanced approach creates an environment that is free from harmful pesticide sprays and other harmful farming techniques.
